NOTE FOR DCI

SUBJECT: Electronic Countermeasures

Apparently, your staff has been asked to have you reread this memorandum before your meeting tomorrow with [redacted]. If the subject comes up, which I now understand is likely, you can say that we appreciate STAP's interest and are looking into what we agree is an important problem. I am not sure that STAP's recommendation for proceeding, contained in paragraph 3, is exactly what we will do. But, I am pleased that the Panel apparently took to heart your suggestion that their studies contain specific recommendations. This subject is one on a list of items that I will be discussing with [redacted] shortly. I need to determine if there is more information that STAP can usefully provide before we ask individual committee chairmen to take on the issue.
